SECTION I

INTRODUCTION

This Illustrated Parts Breakdown is applicable to the Navy Model FJ-2 Airplane, manufactured by North American Aviation, Inc. of Columbus, Ohio.

The purpose of the Illustrated Parts Breakdown is to list the items necessary for support of the article. This breakdown will be used for requisitioning, storing, issuing and identifying parts and for illustrating assembly and disassembly relationship.

Supplementary information on the operation, repair and maintenance may be found in the following publications:

AN 01-60JKB-1	Flight Handbook
AN 01-60JKB-2	Handbook of Maintenance Instruction
AN 01-60JKB-3	Handbook of Structural Repair

This Catalog is divided into three sections:

Section I	Introduction
Section II	Group Assembly Parts List
Section III	Numerical Index

NOTE: In order to expedite the delivery of Spare Parts, the Airplane Model, Serial Number, Part Number and Title should be supplied when requesting parts. The exact position, function and other pertinent data contributing to the adequate identification of parts, if supplied with the requisition, may well avoid costly delay in procurement.

Q.E.C.A. EXPLANATION

The Quick Engine Change Assembly is indicated in the Group Assembly Parts List, Section II, by a symbol * preceding the part number.

The figure to be referred to for a complete listing of Q.E.C.A. parts is indicated by an * to the left of the figure title under the POWER PLANT SECTION of the TABLE OF CONTENTS.

"USABLE ON CODE" EXPLANATION

"Usable on Coding" has been employed throughout this Catalog to indicate the limited use of certain parts. These "Usable on Codes", indicate the Navy Serial Numbers of the Airplanes on which these parts may be used.

For example, the "Usable on Code" (A-B) after a part would indicate that this part may be used beginning with the first airplane of code (A) (FJ-2, 131927) to and including the last airplane of code (B) (FJ-2, 131961).

The "Usable on Code" (B-) would indicate that the part may be used beginning with the first airplane of code (B) (FJ-2, 131939), and on all subsequent FJ-2 airplanes. Note that on this type code the hyphen "-" is used to mean "and Subs".

The "Usable on Code" (BA) without the hyphen "-", would indicate that the part may be used only on airplane (FJ-2, 131939).

Parts not coded are usable on all FJ-2 airplanes.

Usable on Code	Model	Navy Serial Numbers

Introduction

THIS PAGE LEFT BLANK INTENTIONALLY

SECURITY INFORMATION — RESTRICTED

AN 01-60JKB-4

Section I Introduction

SECTION II—GROUP ASSEMBLY PARTS LIST illustrates and lists parts which are stocked or likely to be stocked as being capable of replacement. Parts which have lost their individual identity as a result of being fabricated into a permanent assembly are not listed.

- FIGURE NUMBER—The number of the illustration in which the assembly or part is shown.
- INDEX NUMBER—The number assigned to the assembly or part to permit cross reference between the nomenclature and illustration.
- PART NUMBER—North American part numbers are derived from North American drawing numbers. In all instances, the part number contains the drawing number. However, in some cases, the part number may be composed of the drawing number plus dash number suffixes. Such parts, like all other North American parts, may be found on the basic North American drawing. For explanation of drawing numbering system see page 4.
- When LEFT AND RIGHT-HAND PARTS are listed together under one index number, the left-hand parts are shown on the illustrations.
- REF—(a) indicates non-procurable parts (b) each subsequent time that the same part number appears the word "Reference" is inserted to indicate that provisioning review for the item has been previously considered in total.
- "UNITS PER ASSEMBLY"—Contains the number of units required per one next assembly.
- AR indicates "As Required"—No specific quantity.
- ATTACHING PARTS are listed immediately after the item being attached and preceding any components of the item. Symbol (—) indicates close of attaching parts.
- (GFP) indicates government-furnished property. (No detail breakdown is furnished in this catalog for these parts). See NavAer 00-500.
- VENDORS' CODE shown after title—for complete firm name and address, see Alphabetical List of Vendors (page 7).
- USEABLE ON CODE—for explanation see page 1.
- (MAGNETIC INSPECTED) indicates 100% inspection in accordance with MIL-1-6868A.
- INDENTATIONS of titles indicate the relationship of each item to its next higher assembly. For example, the items shown in column 3 are the component parts of 181-13020-1 and 181-13020-2 Rib Assemblies.

SECTION III — NUMERICAL INDEX is the index for the catalog, and in addition lists all part numbers on the airplane for source code and microfilm information. This section is divided into three groups—"Numerical Index of Special Tools and Equipment", "Numerical Index of Contractor Parts" and "Numerical Index of Standard and Vendor's Parts".

- STOCK NUMBERS as established by the Aviation Supply Office.
- The TOTAL QUANTITY COLUMN lists the total quantity of parts per aircraft.
- SOURCE CODES as established by the Bureau of Aeronautics—for definition see page 6.
- The NUMERICAL ARRANGEMENT is in accordance with specification MIL-B-5005A.
- FIGURE AND INDEX NUMBER—where parts are illustrated and listed.
- MICROFILM INDEX NUMBERS as established by the Bureau of Aeronautics.
- (USE—) indicates the superseding part.
- COMMERCIAL PARTS and parts for which no part number is available are listed at the beginning of the third group of the Numerical Index in alphabetical order.
- For STANDARD PARTS, including the Contractor's Standards, only one figure and index number is listed.

181-14									

Numbers are assigned to North American Aviation Drawings in accordance with the chart on the opposite page. The basic number (number after the dash) assigned a drawing is determined by the function it performs. For example, Electrical Drawings are assigned numbers in the 54000 series, Hydraulics Drawings in the 58000 series, etc. The identity of a part is determined by the functional group for which it was designed, regardless of its location in the airplane or of its method of attachment. The number before the dash is the North American Aviation Model Designation for the airplane for which the part was originally designed. However, a part originally designed for one model may be used on any other model and if the part remains the same the drawing number also remains the same.

N.A.A. Standard Part numbers consist of a number, alphabetical letter and another number. The alphabetical letter in this Part Number arrangement is taken from the first letter of the descriptive noun identifying the part. In some cases the basic number is the part number while in others, dash number coding is added to completely define the size, material, etc. For example, 4B12-2, 5B7, 6C8, 2N1, 2P3-3, 6R1-2, 7S4-10-10, etc.

Code symbols refer to notes on face of Dwg.

102-Prefix indicates that part was first designed for N.A.A. Model 102 (P-51B).

Basic Number in 54000 series indicates a part designed for the Electrical System. (See chart on opposite page.)

Model Column shows all models on which part is used.

NUMERICAL INDEX

CLASS CODE	STOCK NUMBER PART NUMBER	DESCRIPTION	SOURCE CODE	USABLE ON CODE	MICRO- FILM INDEX
	E1572-3	CLEVIS, Hoist cable to ring attaching			
	E1581	RING, Hoisting sling			
	E1927	SLING ASSEMBLY AND INSTALLATION, Engine hoisting			
	E1927-3	SLING ASSEMBLY, Engine hoisting			
	E1927-5	CABLE ASSEMBLY, Engine hoisting			
	E1927-7	WELD ASSEMBLY, Engine hoisting			
	E1927-9	WELD ASSEMBLY, Engine hoisting lower			
	E1930	SLING ASSEMBLY, Airplane complete hoisting			
	E1940	SLING ASSEMBLY, Fuselage rear section hoisting			
	E1942	YOKE ASSEMBLY, Rear fuselage hoisting forward attaching			
	E1943	YOKE ASSEMBLY, Rear fuselage hoisting aft attaching			
	E1944	BOLT, Wing hoisting-sling			
	E1945	SLING ASSEMBLY, Wing panel intermediate hoisting			
	E1945-11	SLING SUB ASSEMBLY, Wing panel intermediate hoisting LH			
	E1945-13	SLING SUB ASSEMBLY, Wing panel intermediate hoisting center			
	E1945-15	SLING ASSEMBLY, Wing panel intermediate hoisting RH			
	E1945-17	SLING SUB ASSEMBLY, Wing panel intermediate hoisting upper			
	E1946	FITTING, Wing panel intermediate forward hoisting			
	E1947	FITTING, Wing panel intermediate inboard aft hoisting			
	E1948	FITTING, Wing panel intermediate outboard aft hoisting			
	E1949-3	CLEVIS, Wing panel hoisting			
	E1959	FITTING ASSEMBLY, Fuselage station 52 forward hoisting			
	E1960	BOLT, Fuselage station 52 and 235.188 hoisting			
	E1963	FITTING ASSEMBLY, Fuselage station 235.188 aft hoisting			
	E1964	FITTING ASSEMBLY, Fuselage station 235-3/16 aft hoisting			
	E1965	FITTING ASSEMBLY, Fuselage station 52 forward hoisting			
	E2552	RING ASSEMBLY, Airplane complete hoisting			
	T120	PROTRACTOR			
	T-121	ADAPTOR, Protractor surface control			
R82NA	T158	PROTRACTOR ASSEMBLY, Surface controls		P	
	T191	CONTAINER ASSEMBLY, Protractor			
	T268	PIN, Fuselage to wing attachment aligning			
	T276-10	PEEPSIGHT ASSEMBLY, Fixed gun boresight target aligning			
	T277-30	RINGSIGHT ASSEMBLY, Fixed gun boresight target aligning			
	T278	BOX ASSEMBLY, Gun boresighting and alignment fixtures			
	T308	TOOL, Wing hinge pin removal			
	T309	HANDLE ASSEMBLY, Wing hinge pin installation			
	T310	TOOL, Wing hinge pin installation			
	T462	WRENCH ASSEMBLY, Wing joint attaching bolt			
	T463	TOOL, Wing fold manual unlock drive			
	T464	TOOL SET, Wing hinge pin installation and removal			
	T465	TOOL, Wing fold hinge pin installation and removal			
	T466	CONTAINER ASSEMBLY, Wing hinge pin instl and removal tool set			
	T466-15	BUCKLE ASSEMBLY, Wing hinge pin instl and removal tool set			
	T467	FITTING, Heat and vent system duct pressure test			
	T468	KIT, Boresighting and target aligning fix			
	T469	WRENCH ASSEMBLY, Fwd to rear fus attaching fitting upper torque			
	T470	WRENCH ASSEMBLY, Fwd to rear fus attaching fitting lower torque			
	T472	ADAPTOR, Wing joint attaching bolt wrench			
	T477	WRENCH ASSEMBLY, Wing joint 1/2" hexagonal attaching bolt			
	T487	TOOL ASSEMBLY, Fuel quantity gage co-axial cable sleeve			
	T71	PROTRACTOR ASSEMBLY, Surface controls		P1	
	134-61073-2	RING, Boresight target aligning sight			
	134-61074-2	CROSS HAIRS, Boresight target aligning sight			
	151-73073	MAT ASSEMBLY, Wing walkway			
	170-73074	HOOK ASSEMBLY, Wing walkway mat
